SUMMARY

Computer Science student focused on Python, data science, and machine learning, with hands-on experience building practical applications and working on an AI/ML internship. Comfortable learning new tools through projects and using programming to solve concrete problems.

EDUCATION

Jain University, Bangalore, Karnataka Expected Graduation: September 2028
Current Status: Second-Year Student

EXPERIENCE

Shivohini – AI/ML Intern May 26, 2026 – Aug 1, 2026

- Built and refined a rule engine for a fire-safety tool recommendation model.
- Helped translate fire-safety requirements into structured rules used to generate recommendations.

PROJECTS

AI Voice Assistant

- Built a Python-based assistant capable of recognizing and executing voice commands using speech recognition.

Message Encryption Tool

- Developed a Python application for secure message encryption and decryption, applying core cryptographic concepts.

Personal Portfolio Website

- Designed and deployed a personal portfolio website using Vercel with a custom domain, gaining hands-on experience in web deployment and domain management.

ML4SCI – JetNet-SR-PFlow

- Contributed to a machine learning pipeline for optimizing LHC calorimeter simulations.
- Implemented a two-stage system using Generative Flow Matching and Set-to-Set Transformers.
- Achieved 1:1 particle matching (30/30) on the JetNet dataset.
- Worked with GPU-accelerated training (NVIDIA) for improved validation.

SKILLS

Programming:	Python (NumPy, Pandas, Object-Oriented Programming), C, C++, Java, JavaScript, TypeScript, HTML, CSS
Frameworks / Libraries:	PyQt5, NumPy, Pandas; learning Scikit-learn and Matplotlib
Databases:	MongoDB, SQL
Concepts:	Encryption, Speech Recognition
Tools:	Git, GitHub

HACKATHONS

- Participated in 3+ hackathons and worked with teams to build functional prototypes under time constraints.
- Developed backend systems and database logic, including work with Supabase and MongoDB for data management.

CERTIFICATIONS

Electronic Arts – Software Engineering Job Simulation (Forage)

- Completed practical tasks replicating those of a Software Engineer at Electronic Arts.

AWS APAC – Solutions Architecture Job Simulation (Forage)

- Completed modules on designing and implementing cloud solutions, gaining exposure to core AWS services and architectural best practices.
